

Ergonomics is about

solutions, not assessments

RPM 8.0 offers a Web-enabled software solution for industrial organizations seeking a tool to manage their ergonomic improvement process across the enterprise. Unlike other ergonomics software programs, RPM 8.0 drives your ergonomic improvement process, and is specifically designed to allow you to spend more time implementing solutions and less time evaluating jobs. RPM 8.0 is focused on managing every aspect of your ergonomic improvement process from a single Web-enabled interface.

Whatever your organization's structure or objectives, RPM 8.0 will revolutionize the way you manage your ergonomic improvement process, both now and in the future.

Risk Priority Management™

Humantech

Drive Improvements and Focus Efforts

Streamlined ergonomic assessments and a practical approach to job improvements ensure that your focus is on implementing solutions, allowing you to apply your limited resources to jobs with the greatest risk exposure.

Find Solutions

A searchable solutions database is easy to use and instantly connects you with ergonomic improvements already in place in your company.

Match Employees to Suitable Jobs

Easily identify jobs suitable for individuals with work restrictions and share information about those jobs with medical providers, including photos, video clips, and physical demands.

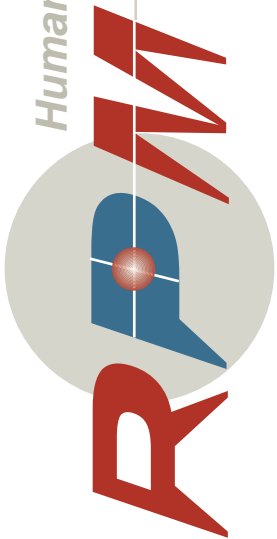

Report Results

Quickly and easily generate reports to review the progress of ergonomic improvement activities.

RPM 8.0

Advantages

- ✓ Identify your issues and what you need to do to fix them using a five-step ergonomic improvement process.
- ✓ Find ergonomic improvements already in place across the enterprise using the searchable solutions database.
- ✓ Use the single Web-enabled interface to easily access all sites and maintain a consistent enterprise-wide approach to your ergonomic improvement process.
- ✓ Implement quick fixes and perform in-depth assessments with nine different ergonomic analysis tools.
- ✓ Be aware of significant ergonomic issues; the red-yellow-green ergonomic risk priority indicator alerts you of their presence.
- ✓ Save time and effort generating progress reports with RPM 8.0's built-in, exportable reports.
- ✓ Match employees with work restrictions to suitable jobs based on physical demands criteria.
- ✓ View and share photos and videos of job tasks to reduce the number of shop visits.
- ✓ Use the automatic e-mail function to remind individuals of due dates for their ergonomic improvement activities, and quickly create progress reports to track the status of the improvements.
- ✓ Define unique user permissions to match each person's role in your ergonomic improvement process.

About Humantech

Since 1979, Humantech has accelerated workplace improvements to enable people to perform at their best. Humantech provides vital workplace solutions through Human Performance Ergonomics™, employee engagement, task-specific problem solving, training programs, and extraordinary service. The results are operational excellence, increased profitability, and improved worker morale, as well as reduced workplace injuries and costs related to inefficiencies. With a corporate office in Michigan and consultants across the country, Humantech consults with successful companies worldwide. The 30-Inch View™ is a service mark of Humantech, Inc., 2007.
