

## Increase Productivity and Accelerate Health and Safety Excellence!

Learn to make simple and effective human performance improvements in the workplace with these open-enrollment training programs offered by Humantech's experienced ergonomists. Hands-on problem solving methods will help you recognize, evaluate, and control ergonomic risk.

### Applied Industrial Ergonomics

This two-day course provides the tools and resources to make simple and effective ergonomic improvements in the industrial environment. The seminar emphasizes hands-on problem-solving methodologies to recognize, evaluate, and control ergonomic risk. Attendees will learn how to evaluate workstations and equipment for good ergonomics design, identify contributing factors to work-related musculoskeletal disorders, prioritize ergonomic improvements to maximize return on investment (ROI), and much more. The program is intended for health and safety professionals, ergonomics committees, and manufacturing engineers.

### Managing an Ergonomics Process

This workshop will focus on developing the abilities of participants to recognize, plan for, and integrate the strategic or management system elements into their current ergonomics program. The topics will build on the results of a recent benchmarking study of successful ergonomic programs, the experience working with Fortune 500 and global company practices, and will draw from the experiences of class participants. As a result of the workshop, participants will have a broadened perspective and understanding of key elements of successful ergonomic programs. In addition, they will be able to identify opportunities and "next steps" to strengthen their own program and method of program management. This course is not an introductory course and should not be your first exposure to ergonomics. Completion of the Applied Industrial Ergonomics course is highly recommended.

### Advanced Ergonomic Design Workshop

This new course is labeled "Workshop" for a reason. We take you beyond the identification and assessment of ergonomic risk, and head into "designing out" the risk in the first place. Through group activities and a unique simulation exercise, you'll learn specific design guidelines for workstations, tools, controls and displays, and manual material handling; how to apply ergonomics criteria to equipment design; and how to evaluate proposed and existing equipment. The workshop includes The Handbook of Ergonomic Design Guidelines, a \$385 value. This course is not an introductory course. Completion of the Applied Industrial Ergonomics course is mandatory.

## Courses, Locations, and Dates

Applied Industrial Ergonomics	Managing an Ergonomics Process	Advanced Ergonomic Design Workshop
April 21 - 22	April 23	
June 23 - 24		June 25
Sept. 22 - 23	Sept. 24	
Nov. 3 - 4		Nov. 5

To register, call Humantech at (734) 663-3330 ext. 132 or go to [www.humantech.com/seminars](http://www.humantech.com/seminars).

# Seminar Location and Lodging

All 2015 seminars will be held at Humantech's corporate office located at the address below. For lodging information, directions, and public transportation, visit [www.humantech.com](http://www.humantech.com). Some hotels have group rates. When making your reservation, mention Humantech to receive the discount.

## Ann Arbor, MI

Humantech Corporate Office  
1161 Oak Valley Drive
